** ARGENTINA [non]. 9455, Mon Jan 26 at 2312, RAE S9+20/30 via WRMI in Spanish, not Portuguese, as usually heard and still scheduled at 2300-2400 on the RAE skedgrid which is not labeled System A - why not? on 7570 & 9955 instead. 7570 is really off and 9955 is Wavescan! The System D sked does show 9455 with RAE PP on Mon/Tue/Thu/Fri only. So will there be 3-year-old Portuguese DX olds again after 2300 Tuesday on 9455? (Glenn Hauser, OK, WOR) Yes:

** ARGENTINA [non]. 9455, Tue Jan 27 at 2259, this WRMI VG after WRN ID and fragment of FSN before chopped short as usual for canned WRMI ID, joining RAE feed running a bit late, as closing English with date Jan 26, which is almost today! And 2301 right into Portuguese, but no datestamp. I`m listening to evaluate whether there be DX news or olds in `Atualidade DX` which starts already at 2302, credit to Arnaldo Slaen. First: Holy Qur`an, Algeria, 17550 via Ouargla at 1937. This fq is not in current skeds, nor any Qur`an service from there. 6115 R. Congo, Brazzaville at 1734 -- this one has been off the air for years. Denmark, LP WMR from Randers on 25800 - that could be current. Manuel Méndez credited for: Poland via K-K Germany 6005 at 15h; 6165 R. Europe 24, playing Ukraine NA. Malaysia, 9835 Sarawak FM -- this has been off for many months or years. R. Educ., CDMX, 6185 at 0354, 0715. Holland lowpowers by MM, 5955 at 0550, 0620; 6130 R. Europe 1855-1920.

I then search WOR iog archive on some specific numbers attributed to Manuel, and find *several* of the items cited were in his report dated October 25, **2022** --- Congo, Denmark, Poland/Germany, Malaysia, Mexico, Netherlands!!! DON`T YOU BELIEVE THE DX OLDS ON THIS PROGRAM.

Then about Peru, 28 frequencies in 17 locations available for sale? And a very long article about a Rádio Mulher in Guiné-Bissau, with some connexion to Spain, BTW with annoying musical background; 2315 about 100th anniversary of MEC, R Nacional in Brasil. 2318 outro Atualidade DX, 2319 multi-lingual IDs (Glenn Hauser, OK, WOR)

** BRAZIL [and non]. 5939.48, Jan 23 at 0720, R. Voz Missionária on its signature off-frequency, S7/S8 JBA tnx to attenuated so not a problem 5935 WWCR only S9+5/20. Nothing propagating on RVM`s 9665v or 11755v. Rudolf Grimm reports: Mr. Alvaro Barcelos (engineer / technician at Radio Voz Missionária) recently informed that the 5940 kHz transmitter / antenna system has been technically revised, now powered by 10 kW resulting in stronger signal (Glenn Hauser, OK, WOR)

** CANADA. 346 MCW kHz, Jan 28 at 0725 UT, dash and YXL, 500-watt NDB at Sioux Lookout ON, had not been audible for several nights with northerly propagation suppressed. It`s my #1 Canadian, but now two slightly weakers are also JBA:

351 MCW kHz, Jan 28 at 0727 UT, dash and YKQ, 500 watts at Waskaganish, the only QC I sometimes get, and:

382 MCW kHz, Jan 28 at 0729 UT, dash and YPL, 1000 watts at Pickle Lake ON (Glenn Hauser, OK, WOR)

** CANADA [and non]. 1190, Jan 28 at 0733 UT, ``AM 1190`` non-ID and weather, lo -21 and hi -14. Wow, really deepfreeze, must be northerly. NRC AM Log shows only station on 1190 deliberately IDing that way is CFSL, Weyburn SK, U2 10/5 kW. Temps are not as bad as if they were F instead of C, and closely match forecast for Weyburn. Supposedly nothing but northward at night, don`t you believe it. I was checking 1190 for anything in Spanish as ``La Ley`` which someone asked me to ID, nonesuch listed in US or Mexico (Glenn Hauser, OK, WOR)

** CANADA. 15034 USB, Jan 22 at 1534, Trenton Military with aviation weather for Zagreb, one of the strange locations always covered in rotation. Why is there now concern about Zagreb, and also Split, to Canadian forces?? (Glenn Hauser, OK, WOR)

** CANADA. 28170 CW, Jan 26 at 2250, VVV DE VA3XCD/B. WGB list: ``28170.0   VA3XCD/B - Camden East ON CAN FN14nj - #0 (18 Jan 2026) Note: VVV de ID + Camden East + grid - pwr 1.5w - Slow keying`` - also many more 10m beacons now. QRZ.com: ``VA3XCD Canada flag Canada, William G Pooley, 400 DEWEY ROAD RR3, YARKER, ON K0K 3N0, Canada`` - Yarker is just N of Odessa, NW of Kingston (Glenn Hauser, OK, WOR)

** CANADA. 28350 USB, Jan 26 at 2253, VE3EVQ ID, taking a break, back in 5 minutes. QRZ.com search on that call instead leads to apparent alternate/additional call of sameham: ``VA3UU Canada flag Canada, Jack Coleman, P.O. BOX 15, LEASKDALE, ON L0C 1C0, Canada`` - Leaskdale is between Lake Simcoe and Oshawa (Glenn Hauser, OK, WOR)

** CHINA [non]. See MALI

** COLOMBIA. 1309.67, Jan 23 at 0757 UT, JBA carrier hetting 1310.00 signals. Mwoffsets has a neat hit and nothing else nearby: ``1310 1309,676 CLM Voz de la Patria Celestial (Barranquilla) [range: -1309.68] measured on 2024-02-03``. HJAK
Speaking of Bqa, also had just noted again HJAT deviant on 1100.29 (Glenn Hauser, OK, WOR)

** COLOMBIA. 6010, Jan 22 at 0723, S8 in Spanish from LV de tu Conciencia, better than usual JBA or JBA carrier (Glenn Hauser, OK, WOR)

** COLOMBIA. 10125 CW, Jan 23 at 0716, HK3QQ, with his always loop of letters in keyboard order including some errors, as I have detailed before. Often audible but not relogged. Now however, it`s notable because I`m getting this after finding ZERO signals on the 9 MHz broadcast band! If there were ANY around Colombia they would be audible too (Glenn Hauser, OK, WOR)

** CUBA. 5025, Jan 25 at 0011, S9+25/35 of dead air in Spanish direct from R. Rebelde, where something`s always wrong (Glenn Hauser, OK, WOR)

** CUBA. 11880, Jan 23 at 2106, RHC manages to under-modulate, in French, S9+10/20 direct, // 15140 S8/9 with windhowl. Was preceding hour dead air as usual in English? (Glenn Hauser, OK, WOR)

** CUBA [and non]. 11760, Jan 25 at 0729 UT, S6/S8 of deadair, obviously RHC failed to turn off hours ago, the SSOB except for 11780 RBA Brasil already on (Glenn Hauser, OK, WOR)

** CUBA. 11880 and weaker windhowly 15140, Jan 26 at 2005, RHC in English instead of dead air! into Knoxville SDR. Did not check yesterday, but Terry Krueger, NW FL, tells me:

``RHC in English at local level and great audio today. That’s been the standard for awhile, mornings in Spanish on 11760 until flipping later to 11880. But today - 25 January - in English from 2000 GMT (after a half hour of Haitian Kreyol). But the “wow” is they played several tracks by a radical politically-charged black US band from the late 1960-1970s, The Last Poets. Credited as the beginning of rap. A stern warning in advance announced, the lyrics. And there it was. Loads of the words N***** and and F*** dropped`` (Glenn Hauser, OK, WOR)

** CUBA. 11880, Jan 26 at 2110, RHC has continued modulating French after English, but suddenly stops at 2116, carrier off? or back on

with dead air only; while inferior windhowly 15140 has continued Frenching. Something`s always wrong at RHC (Glenn Hauser, OK, WOR)

** CUBA. 11760, Jan 26 at 2307, RHC in Spanish S9+10/20 with windhowl, // 11880 VG and clear S9+10/20 when tuned in USB mode, S9+20/30 in AM mode (Glenn Hauser, OK, WOR)

** CUBA. 11760, Jan 27 at 0720, this RHC is still on way late, S9/+15 with undermodulated Spanish ID, windhowl. Something`s always wrong at RHC (Glenn Hauser, OK, WOR)

** CUBA. 6000, Jan 28 at 0237, S9+40 of dead air in English? from RHC where something`s always wrong (Glenn Hauser, OK, WOR)

** CUBA [and non]. 9700, Jan 28 at 0231, S7/S9 sounds JBM, in Spanish. What`s really happening, I think: RHC with dead air, atop much weaker CRI in Spanish making a SAH, as scheduled via Kashgar, East Turkistan at 00-03, and seems // 9590, Commies vs Commies! (Glenn Hauser, OK, WOR)

** CUBA. 11760, Jan 28 at 1939, RHC in Kriyol, S8/S9 undermodulated, also 15140 S9 vs windhowl. SAWA (Glenn Hauser, OK, WOR)

** CZECHIA [non]. See USA: WRMI 5950; also, via Mike Terry: https://english.radio.cz/90-years-air-radio-prague-international-marks-anniversary-qsl-cards-8875728
(Glenn Hauser, OK, WOR)

** MALI. 13630, Jan 28 at 2125, discussion in American English, so must be CRI relay, S3 direct. Stops at 2130 interrupting discussion and after a brief pause resumes with CRI IS and opening French. This is deliberate, not a mistake. All English broadcasts last an hour and start at top of hour, but gotta get French on when it start. HFCC shows continuous 1930-2230 for CIRAF 53, 100 kW at 111 degrees; first semihour in Portuguese, last hour in French (Glenn Hauser, OK, WOR)

** MEXICO. 570, Jan 26 at 0532, Spanish YL talk dominating instead of KLIF or anything in English. At 0602, Mexican NA is playing, kid-choral ``full`` version which means when you think it`s over, another verse plays. Finally finishes at 0604* and cuts OFF the air, uncovering algo in English. IRCA Mexican Log`s frequency list at the bottom has info about NA handlings:

``570 XEBJB NL SAN NICOLAS DE LOS GARZA CST Full (4:40) children's choral just before or after 6 am. Full (4:40) children's choral just before or after Midnight. 81-8125-3500 (None) LIVE

570 XEOA OAX OAXACA CST Choral (full - presumably children's) about 5:57 am. Children's choral (full 4:40) about 5 minutes before Midnight. 52 951 513 5740, 52 800 212 95``

There are two other 570s, one of which ``silent``, XELQ Morelia Mich. and XETD Tecuala Nayarit, unlikely compared to the others. Very likely XEBJB near Monterrey NL. But XEBJB and XEOA are supposedly 24 hours (Glenn Hauser, OK, WOR)

** MEXICO. 610, Jan 24 at 0734, Spanish atop Kansas City, mentions ``complacencias -- Santa Rosalía``, i.e. requests from town on east coast of BCS, not too far from XEGS, Guasave, Sinaloa, across the Sea of Cortez, so maybe that`s it (Glenn Hauser, OK, WOR)

** MEXICO. 660, Jan 26 at 0605, kid-choral NA is playing, until 0609 finally full ID as 92.1 & 660 in Monterrey, ``ABC Deportes, sabemos cómo se juega``, immediately into song in English, ``Young Girl`` -- really a beautiful song, and I suppose originally no problem with the

lyrix, but listen to them now, could be Jeffrey Epstein`s lament of a pedophile!

``Song by Gary Puckett & The Union Gap · 1968:
Young girl
Get out of my mind
My love for you is way out of line
Better run, girl
You're much too young, girl...``
https://music.youtube.com/watch?v=wdpJFWwNbGk

And 0613, ``Esto es ABC Deportes`` BTW, this 660, XEFZ, tho 1 kW night, is the regular Mexican heard, not 10 kW XEEY Aguascalientes2 which I used to get, let alone 10 kW XEDTL CDMX, nominal night powers in WRTH 2026 (Glenn Hauser, OK, WOR)

** NEW ZEALAND. 9700, Jan 25 at 1531, song in English, S7/S8 direct. Aoki & EiBi have nothing until 1651 for RNZP, but HFCC shows 9700 *available* for that anytime between 0900 and 1800. Own Howtolisten page claims 9700 on air ONLY on Saturdays in AM at 1651-1858, but this is Sunday, axually local Monday already; and 7390 supposedly daily 1259-1650 which I did not think to check at the time. Another failure to follow own published sked; something`s wrecked at Rangitaiki (Glenn Hauser, OK, WOR)

** NEW ZEALAND. Reply to my RNZP 9700 log last time: ``Hi Glenn, RNZP are having problems with one of the 50 KW transmitters they normally use for DRM into the Pacific Islands and are having to use the other for best purposes to cover the islands. Nothing is wrecked at the station. One should remember RNZP is there to provide radio services to the Southern Pacific, not Trump Land. Cheers,
Ken Baird, 6 Willis Grove, Wainuiomata, Lower Hutt, NZ, 5014
Phone: 027 285 1476
e-mail <ka.baird@xtra.co.nz>
Location: 41.16.36 S; 174.58.00 E
Radios: BCL-2000, DX394, Tecsun PL680
PL880, ATS 25X2, SDRplay RSP1A
Antennas: 10 and 8m random wires, 4.5m Vertical
I-BRA-4 multi element 1/4 wave.``

``Hi Ken, I am well aware we are not a target of RNZP. My complaint was that it was not following its own posted sked, or vice versa. Perhaps `wrecked` was a bit too strong, as I struggled for some alliteration other than `wrong` - I have also criticized US and other stations for not following own schedule correctly. BTW, most of US is *not* Trumpland. 73, Glenn``

Now another check, Jan 26 at 1514: no signal on 9700, but JBA on 7390 (Glenn Hauser, OK, WOR)

** NORTH AMERICA. 6950 AM, Jan 26 at 2249 direct, pirate music, announcement, JBA direct. These say it`s R. Free Euphonia:
https://www.hfunderground.com/board/index.php/topic,157698.0.html
(Glenn Hauser, OK, WOR)

** NORTH AMERICA. 9974.96 USB, Jan 26 at 2032, continuous music sounds best slightly downtuned from 9975.00 via Knoxville SDR, S5/S7 but JBA direct; tnx to tip from Eric Fetters-Walp / Lake Stevens, Washington:
``Pirate station Mix Radio International is currently playing a mix of techno music and smooth jazz up on 9975 USB as of 1950 UTC. It's been on since well before 1900. I'm not hearing it directly out west here, but it's coming in well at many of the East Coast SDRs.``

Kept on running and I never hear any announcements, at chex; 2128, 2200, 2223; by 2322 direct it`s S9/+10, still going past 0110 UT Jan

27! By 0140 fading down and gone or off by 0150. Many more reports here starting at 1830: https://www.hfunderground.com/board/index.php/topic,157683.0.html but no reports later than 2350! Zach Liangas says it was audible into some Euro remotes at 2308 (Glenn Hauser, OK, WOR)

** NORTH AMERICA. 12155 USB, Jan 27 at 2125, pirate music S6 into N Utah SDR, 2121 ID?, and 2129. By 2152 S6/7, 2238 S5/6. Still going at 2320, S6/S7, ``My One and Only You``; 2324 ``International Free? Music Radio, Mix Radio International``; 2327 ``Runaway``, 2336 another announcement, still past 2348 and past 0018 UT Jan 28. This one has affinity for WWCR frequencies not in use: 12155/12160, 9975/9980! Many more reports here: https://www.hfunderground.com/board/index.php/topic,157722.0.html

Tnx to this original tip: ``[WOR] Pirate on 12155 USB as of 1900 UTC --- There's another pirate broadcasting well above the 43-meter band today. Up on 12155 USB, there's a station that's been broadcasting classic rock and R&B music since before 1900 UTC. It's presumed to be Mix Radio International again, as the operator mentioned on HFUnderground.com's Discord channel that the station might show up there today. But so far, no IDs heard. Unlike Mix Radio International yesterday, today it's being heard well as far west as the Northern Utah SDR, and I'm hearing trace audio at times at my location so far. Eric Fetters-Walp, Lake Stevens, Washington, My QSL website: https://treehouseswl.mystrikingly.com ``
(Glenn Hauser, OK, WOR)

** OKLAHOMA [and non]. 1040 kHz, re hearing a very weak C2CAM here instead of normal WHO bigsig, I recall that when near the 960 KGWA antennas in NW Enid years ago, I detected a spur? from KGWA on 1040; never confirmed at home several miles away, but a possible explanation rather than attenuated WHO (Glenn Hauser, OK, WOR)

** OKLAHOMA. 1300 kHz, Jan 26 at 0535 UT, ``Real Talk``. No stations named this in NRC AM Log, so I try WTFDA FMDB for any R-T station with a connexion to 1300 as a ``relay of`` - again no hits. Broad search on slogan and frequency lead to: KAKC Tulsa! Whose primary slogan is ``The Patriot``. Day pattern barely reaches Enid on fringe contour, but night pattern has deep notch thisaway, so suspect day pattern and/or power. U4 5/1 kW (Glenn Hauser, Enid, WOR)

** OKLAHOMA. 5140 USB, Jan 25 at 0010, no activity on Emergency Operations net frequency, but news reports that EOCs are monitoring the situation of Winter Storm Fern -- how cute, tnx Weather Channel, with frigid temps, heavy ice and snow -- so far in Enid, only snow, temps in the plus single digits F. Also no activity at several random chex of 5140 next few hours (Glenn Hauser, OK, WOR)

** OKLAHOMA [and non]. 5140 USB, Wed Jan 28 at *1500, another weekly Oklahoma Security Net, opened by YL WSHM692, counting 12345, 54321. Her signal and others quite weak, and altho calls uttered fonetikaly, not sure I have copied all accurately. Compare to last weeks Jan 21 & 14 and previous log reports. After above call, she mentions once one other, personal? Like KMYU4JS?? Rollcall:
WQYW443 Beckham County;
WQZT582 Broken Arrow, answered;
WQSY836 where? Byng per Don Moore;
WNPV700 Durant, answered;
WQYW883 Moore, answered JBA;
WNUW215 Ponca City;
KNGR728 Pontotoc County; Don Moore had this in Rush Springs, different non-adjacent county;
WPFY721 Seminole, Ernie answers to Brendah?;
WNBM839 Stillwater, answered;

WNCH624 Tulsa;
WNBE830 Jefferson City MO, answered.

Completed at 1507 till next week; any others? At 1508, WPFY721 contacts WNBE830. This was all totally routine, despite seeming `emergency` ice/storm conditions. Only today with temp to exceed freezing might we venture out, but decide streets are still too hazardous. Enid got 11.5 inches of snow, plus/minus depending on source, but not freezing rain and never any power outages for us (Glenn Hauser, Enid, WOR)

** SPAIN. 12030, Jan 26 at 2308, REE ME frequency, S7/S9 dead air just as it was Jan 21 - so again, or eversince? Is nobody paying attention at Noblejas? 9690 with music S9+20/30, 17715 S9 = high noise level, 17755 JBA carrier (Glenn Hauser, OK, WOR)

** SPAIN. 12030, Wed Jan 28 at 2302, REE dead air at S7/9+10 into Maryland SDR, the ME channel still defective, no one noticing at Noblejas??? Fortunately, we don`t need it as the 9690 for N America is funxional for weekly token English, S9+5/20. 17715 is JBA, 17755 JJBBA. I listen to the first third, when the guy is mainly speaking with his heavy accent: at least we cannot doubt we are listening to Spain. Some of his misprons: ``colleeded, creesis, launch`ed, fattal shooting``. Annoying continuous musical background, and too many long Spanish clips during the `English` news. If we understand that, we don`t need the English, and if we don`t understand it, we don`t need the Spanish! After domestic and international news, 2320 about cinema and TV awards (Glenn Hauser, OK, WOR)

** TURKEY. 5960, Jan 23 at 2301, VOT English not off the air, S7/S9 into Knoxville SDR (Glenn Hauser, OK, WOR)

** TURKEY. 9660.003, Sun Jan 25 at 1743, VOT S9+15/20 into UTwente, as `Letterbox` starts, Cemre speaking slowly, previewing mail from Japan, China, India, UK, Malaysia. There is some ACI splat, but next signal on 9655 is only open carrier: nothing in EiBi, Aoki or HFCC. 1) Alan Roe, Teddington UK, postcard of Ted., Middlesex, lovely handwriting. 2) Mr Miyaki, Hiroshima, Japan, where it`s cold, sent map and postcard. 3) Mr Mei Lin?, Sichuan prov., China, listened via UTwente, Nov, Dec. 4) ?? ??, Spain, two reports from May & Nov 2025, beautiful stamps. 5) ?? ??, Fukuoka pref, Japan, NY card. 6) Mr Annan?, an SWL club in Chennai, India, 2026 colorful calendar. Has 347 members since 1985. Listened via Indian Harbor Beach, Florida SDR. 7) Mr Peter Ng, Johore Bahru, Malaysia. 8) final: Miss Leila? Bell, UK, listened via UTwente, also to Voice of Korea - north. 1801 ending, 1802 theme (Glenn Hauser, OK, WOR)

** TURKEY. 5960.002+, Jan 26 at 2259, VOT not off the air, but JBA direct and 2300 timesignal. At 2351 into UTwente when measured, S9+20/30 s/off as if it`s the 1330 on 13635, something`s always awry at Ankara, 2352 IS once and off* failing to continue extraneously with German (Glenn Hauser, OK, WOR)

** TURKEY. 5960.002, Jan 27 at 2338, VOT not off the air, S9+20/40 into UTwente, Turkish music, 2340 ``always-by-your-side`` promo, etc. (Glenn Hauser, OK, WOR)

** TURKEY. 5960.002+, Jan 28 at 2257, VOT not off the air IS & ID in English, S9+25/35 into UTwente. Next check at 2358, already off, failing to append any extraneous German (Glenn Hauser, OK, WOR)

** U S A. 257 MCW kHz, Jan 27 at 0728 UT, JYR, 25-watt NDB at YoRk NE, not heard for quite a while. See also unID 209 (Glenn Hauser, OK, WOR)

** U S A. 359 MCW kHz, Jan 25 at 0719 UT, GGF, NDB at Grant NE, only audible with above normal condx/below ``normal`` noise level.

407 MCW kHz, Jan 25 at 0726 UT, NDB OOC is JBA mixing/alternating with regular HRU in Herington KS. Only the double-O in the clear, but surely OOC as listed 25 watts `Campi`, Natchitoches LA. It would take quite a while for them to precess enough not to overlap each other as periods are almost the same per RNA list: OOC 7.794 seconds, HRU 7.890 sex (Glenn Hauser, OK, WOR)

** U S A. 8992 USB, Jan 23 at 1522-1524+, USAF crypto exercise from ``Space Run`` - tactical ID sounded like. Full fonetik message, repeated with internal noise burst QRM: D5JKXXWUVHYATFAO3HNO7OMFV3U - the circular symbols are Oscars, not zeroes.

8992 USB, Jan 23 at 2107-2111* caught another one in progress from ``Base Run``: 7LCEG4, then that starts the whole message+ TLFGIXXSIAS67W6CNIZVOURP - maybe the previous one were also Base Run? (Glenn Hauser, OK, WOR)

** U S A. 8992 USB, Jan 28 at 1941, USAF crypto exercise, not bother to copy details, but ID ``This is Analytic, out`` (Glenn Hauser, OK, WOR)

** U S A. 28228 CW, Jan 28 at 1927, DE N6RVI/B, only beacon audible in quick scan, and JBA fading, finally copied full call. WGB list: ``28228.8 N6RVI/B - Spring Valley CA USA DM12lr - #0 (29 Oct 2025) Note: de ID only continuous`` - QRZ.com: ``N6RVI 10-Meter Beacon at 28.228.8 MHz, 9158 Orville Street, Spring Valley, CA 91977, USA --- This 10-Meter beacon is continuously operational and transmits at 28.228.80 MHz with an output of 5 watts PEP. Antenna is an old Antron 99, in omni directional pattern of transmission; 20 feet above ground in a height above average terrain of 310 ft ASL. Power is supplied from a Solar Panel with a regulated voltage into a 12-volt battery using an HTX-100 CW/SSB transceiver, keyer is MFJ-452 progammed to transmit the beacon information. Actual coordinates is at DM12lr90 (32° 45' 35"N and 117° 00' 08"W). This is a properly coordinated 10-meter beacon by IAURU Region 2. Signal or SWL report is highly appreciated with the beacon information transmitted. Please SWL direct or log your reception of my beacon here in qrz.com logbook and I will reply. Thank you. 73, Pete N6RVI`` Spring Valley is a suburb of San Diego (Glenn Hauser, OK, WOR)

** U S A. 28234.5 CW, OOFSOB, Jan 25 at 1535, DE WS2K/B - WGB list: ``28234.5 WS2K/B - Perkasie PA USA FN20jj - #0/1 (23 Jan 2026) Note: ID + grid - Ex 28288`` QRZ.com: ``WS2K USA flag USA, JOSEPH M FLASKA, 323 Kennard Road, Perkasie, PA 18944, USA -- Note: I have decided to continue operation of my coordinated 10m CW beacon. It is on the air continuously. Spots are greatly appreciated. WS2K/B 28.234.5 MHz Power: 10w`` - Perkasie is in east central PA between Allentown and Philly (Glenn Hauser, OK, WOR)

** U S A [non]. 9310, Sun Jan 25 at 1530, no signal from V of tRump via Philippines - because it`s M-F only. WTF,K? I omitted the frequency for this on WOR 2331 (Glenn Hauser, OK, WOR)

** U S A [and non]. WORLD OF RADIO 2330 monitoring: confirmed UT Thursday January 22 at 0030 on WRMI 9395. S9+15/20 into IL remote, following R. Prague in English.

Also confirmed UT Thursday January 22 at 0130 on WRMI 5010, S9+10/20 into Bonaire SDR, following `Frecuencia al Día` and some music fill.

Also confirmed Thursday January 22 at 1730 on SW Radio Gold, Germany, 3975.000, S9/+5 into UTwente.

** U S A [and non]. WORLD OF RADIO 2331 monitoring: confirmed Friday January 23 at 2300 on WRMI 9955, S9+25 into Knoxville SDR, immediately following a show playing ``California Dreamin`, on a Winter`s Day...`` which closes with its own WRMI ID; that would be `OTH Radio`.

Also confirmed Friday January 23 at 2330 on SW Radio Gold, Germany, 3975, S7/S9 JBA into Noale, Italy SDR, but not into UTwente, Bedford or Carlow!

Not confirmed UT Sat Jan 24 at 0400 on WTWW 5085, still off the air as George advised me earlier: he had found a lot of melted wires in that transmitter...

Confirmed Saturday January 24 at 1556 the 1530 on SW Radio Gold, Germany, 3975.001, S8/9+5 into UTwente.

Also confirmed Saturday January 24 at 1630 on WRMI 9955, S9+20 into Knoxville SDR.

Also confirmed Saturday January 24 at 1700 on WRN via WRMI 9395, S9+10 into Knoxville, and // JBA 7730. Next:

0130 UT Thursday WRMI 5010 to S;
1730 UT Thursday SW Radio, Germany 3975 & 6160.
(Glenn Hauser, OK, WOR)

** U S A [and non]. WORLD OF RADIO 2331 monitoring: confirmed Saturday January 24 at 2030 on WRN via WRMI 9395, S9+25/35 into west TN SDR.

Confirmed not on Shortwave Radio Gold, Germany, 3975, Sat Jan 24 at 2030, no signal into UTwente nor Bedford UK, but JBA into Carlow, Ireland, with rock music, SW Radio announcements, rather than WOR which is still on their schedule for this date; have enquired.

Maybe confirmed on WA0RCR, 1860 AM, MO, the 2030v Saturday January 24 at 2043, JBA into N9AZZ IL remote vs HNL, seems like my intonation. Neararby remotes even worse.

Confirmed Saturday January 24 at 2100 on WRMI 9395, S9+35/40 into Georgia SDR, an immediate replay after the 2030 emission.

Also confirmed Saturday January 24 after 2100 on WRN Europe stream.

Also confirmed Saturday January 24 at 2210 the 2200 on WRMI 9395, S9 direct.

Also confirmed Saturday January 24 at 2248 the 2230 on WRMIs 15770 S8/S9 direct and // 17790 S7/S8 direct.

Also confirmed UT Sunday January 25 at 0055 the 0030 on IRRS/IPAR/IRN/NEXUS webcast only.

Also confirmed UT Sunday January 25 from 0403 the 0415v on WA0RCR, 1860 AM, MO, S9+15 into KM4RT west TN SDR, early for a change as expected since preceding ARRL News was on well before 0400.

Also confirmed UT Sunday January 25 at 0730 on WRN via WRMI 7780, S6/S8 while best frequency 5850 is OFF! 7730 with JBA carrier, and tonight 5950 is also off unlike last night. Did not note what was audible on 7570.

Not confirmed Sun Jan 25 before 1100 the 1030 on IRRS SW Romania, 9510, as I happen to awaken about 1055 and not surprisingly, no signal direct.

Also zzzz past 1130 when WRN via WRMI should be on 7570, 7780; anyone? Next:

2000 UT Sunday IRRS SW via AM Italia 1323;
2230 UT Sunday SW Radio, Germany 3975;
2330 UT Sunday WRMI 9455 to NW;
0000 UT Monday WRMI 9395 to NNW;
0030 UT Monday WRMI 7780 to SW;
0930 UT Monday SW Radio, Germany 6160;
2030 UT Monday SW Radio, Germany 3975;
0330 UT Tuesday WRMI 7780 to SW;
1400 UT Tuesday WRMI 9955 to SSE [also web-, phonecast];
1500 UT Tuesday WRMI 9955 to SSE [also web-, phonecast];
2100 UT Tuesday IRRS SW via AM Italia 1323;
0030 UT Wednesday SW Radio, Germany 3975;
0130 UT Wednesday WRMI 9395 to NNW;
2030 UT Wednesday SW Radio, Germany 3975;
2200 UT Wednesday WBCQ 7490v to WSW;
0030 UT Thursday WRMI 9395 to NNW;
0130 UT Thursday WRMI 5010 to S;
1730 UT Thursday SW Radio, Germany 3975 & 6160.
(Glenn Hauser, OK, WOR)

** U S A [and non]. WORLD OF RADIO 2331 monitoring: confirmed Sunday January 25 at 2003 the 2000 on IRRS SW via AM Italia, 1322.998, noisy S7 into UTwente.

Also confirmed Sunday January 25 at 2100 on WRN Europe stream

Also confirmed Sunday January 25 at 2256 the 2230 on SW Radio Gold, Germany, 3975, JBA S3 into Carlow SDR, not UTwente.

Also confirmed Sunday January 25 at 2330 on WRMI 9455, S9+20/25 into Knoxville SDR.

Also confirmed UT Monday January 26 at 0000 on WRMI 9395, S9+15/20 into Knoxville SDR.

Also confirmed UT Monday January 26 at 0030 on WRMI 7780, S9+9/12 into Knoxville SDR. {Meanwhile at 0030 on 9455, formerly WOR, not `Viva Miami` as on System K schedule, but ``Judge Joey?`` reading something.}

Also confirmed UT Monday January 26 at 0401 on Area 51 webcast only. This time did not start before 0400 on WBCQ 5130-, which has to sign-off* at 0400 sharp. As audible via NH remote. Next:

2030 UT Monday SW Radio, Germany 3975;
0330 UT Tuesday WRMI 7780 to SW;
1400 UT Tuesday WRMI 9955 to SSE [also web-, phonecast];
1500 UT Tuesday WRMI 9955 to SSE [also web-, phonecast];

** U S A [and non]. WORLD OF RADIO 2331 monitoring: confirmed Monday January 26 at 2030 on SW Radio Gold, Germany, 3975.001, S7/S9 into UTwente.

Andy at the station explains why WOR did not appear Sat Jan 24 at 2030: ``Hi Glenn, sorry for getting back to you late. I was kicked out by a severe cold during the weekend, and stayed in bed most of the time. Well, you are right on your observations. I just checked the 3975 log file for Saturday. I guess because of the cold I used the previous' Saturday totally forgetting DARC is now at 2h. Before it was at 1 hour, followed by 'Andy Peters Show'. This is what you exactly listened to. All the other programming was one hour late, including yours - aired at 2130 UT. I fixed this right now, so it will not happen the next weeks. Andy``

Next:
0330 UT Tuesday WRMI 7780 to SW;

** U S A. Two signals which normally blast all night are instead much
attenuated, Jan 22 at 0722 UT, only S8/S9 and fading, 5920 WTWW &
neighbor 5935 WWCR. WWV reported:

``:Product: Geophysical Alert Message wwv.txt
:Issued: 2026 Jan 22 0600 UTC
Prepared by the US Dept. of Commerce, NOAA, Space Weather Prediction
Center
#
Geophysical Alert Message
#
Solar-terrestrial indices for 21 January follow.
Solar flux 188 and estimated planetary A-index 73.
The estimated planetary K-index at 0600 UTC on 22 January was 3.33.

Space weather for the past 24 hours has been strong.
Geomagnetic storms reaching the G3 level occurred.
Solar radiation storms reaching the S1 level occurred.
Radio blackouts reaching the R1 level occurred.

Space weather for the next 24 hours is predicted to be moderate.
Geomagnetic storms reaching the G1 level are expected.
Radio blackouts reaching the R2 level are likely.``
(Glenn Hauser, OK, WOR)

** U S A. 5920, Jan 26 at 0524, TOMBS on WTWW S9+20/30 but with big hum and distortion, suptorted, still so at 0730. Probably caused by ice storm circa Lebanon. George said it was hard to get to the site. By 1539, 9930 is S9+25/35 with OK modulation. Wolfgang Bueschel also reported Jan 26:

``5919.988 USA WTWW Lebanon TN – much annoying TERRIBLE BUZZ tone covered signal. S=9 at 0633 UT, 5915.4 to 5924.6 kHz freq range ist covered by 78 (!) x 60 Hertze strings ... 120, 180, 240 ... Hertz either sideband – TERRIBLE BUZZ tone!`` (Glenn Hauser, OK, WOR)

** U S A. 5950, Jan 24 at 0748, surprised this WRMI-8 be on, supposed to close at 0500 after System L. Now S9+30, and also unusually stronger than // 5850! // also // 7570, 7780, discussion in English about nature, presumably WRN relay during Deutsche Welle. However, the always contradictory System E sked does show WRN on 5950 // those and several others not really on air at 07-08 (Glenn Hauser, OK, WOR)

** U S A. 5850, Jan 26 at 0526, this WRMI continues to be AWOL, but 5950 has been extended and with huge S9+50 signal that 5850 used to enjoy. I think that 5950 is now on the 315 antenna that 5850 had used, but is it the WRMI-12 transmitter which had been on 5850, or the WRMI-8 as shown for 5950 at 355 degrees? Programming now on 5950, weaker 7730 & 7780 is S Asian? violin? music. Other WRMI fqs? 7570 off and nothing heard on 9395.

5950 further monitoring: at 0614 operatic solos with piano accompaniment, 0628 outro in English crediting Bamberg Symphony, and 0629 Prague outro via WRN, 0630 into Slovakia in English via WRN, `Listeners Tribune` part 2 music, not really a mailbag. System H sked shows on UT Mon & Tue only at 0600-0630, R. Prague International, i.e. English on 15770, not 5950! And then at 0630-0700 daily, Slovakia in Spanish, not English, on 15770, not 5950! Note that at 0629/0630 transition, both are coming via WRN, and the System E sked shows WRN relay on 5950 and several other frequencies. On 5950 at 0730 it`s WRN Deutsche Welle in English, starting `Living Planet` // 7780 only.

Tony Pavick reports: ``While not weather related, unlike the previous week and as well as with WWCR and WTWW, WRMI suffered its own ring of hell last night as 5850 was extremely unstable. As early as 0200 UT the carrier on 5850 was repeatedly dropping. Reports I saw said that Jeff was returning from HFCC and was notified whilst en route during a stopover in Hawaii. It seems that all 5850 programming has been shifted to 5950 after 0500 UT. 5950 is still on the air at 1230 UT`` (Glenn Hauser, OK, WOR)

** U S A. 15770 // 17790, Jan 26 at 2258 as usual these WRMIs are // - in French? No, I think it`s English with heavy French accent vs lots of background noise, in airplane? WRMI skedgrids are totally confusing. In top xmtr grid, both WRMI-7 on 17790 and WRMI-9 on 15770 with System H, R. Prague International, i.e. English. But System H sked itself shows RPI, M-F at 2230-2300 on 15770 & 7730, not 17790. 17790 is found instead on the System E grid at 2200-2400 with WRN. At 2300 the two split, into Prague in French on 17790, and into Poland in English on 15770. At 2304 I find 5850 back on air after absent yesterday, with French // 17790. But the System H sked claims at 2300-2330, RPI in French on 5850 & 7730.

BTW, all the Systems, despite countless changes, still bear an effective date of March 10, *2024*, except: E July 1, 2025; K Dec 23, 2025; L Nov 14, 2025. See also ARGENTINA [non] (Glenn Hauser, OK, WOR)

** U S A. 9955, Mon Jan 26 at 2316 amid `Wavescan` on WRMI, Jeff is interviewing someone who has visited Pyongyang and elsewhere in Korea

North observing what can be heard on radios there. There are about 3 dozen other chances to hear WS each week on WRMI and some other SW stations, as in our DX/SWL/MEDIA PROGRAMS schedule (Glenn Hauser, OK, WOR)

** U S A. Pre-`AAAWWW` chex of WBCQs, UT Sat Jan 24 at 0056: NH SDR busy so I try K1VL Vermont: 5130 -43 Hz but calibration not checked, is on with IS & ID loop, not much else, so I audition the (7490) stream. No disclaimer about a repeat but from 0100 during `WTO` theme, Allan starts with ``OK, OK... need the shortwave radio more than ever now``, and single exclamation ``hope``. So it`s obviously a repeat of last week`s show, never mind (Glenn Hauser, OK, WOR)

** U S A. 5935 & 4840, Jan 26 at 0525, both WWCRs are OFF, during icestorm in Nashville. More about this, nothing specific, SW not alluded, via Mike Terry:

``Nine USA Radio Stations Off-Air After Winter Storm Cuts Across The Country. FCC January 26 2026

The monster winter storm that cut across the country over the weekend has left at least nine radio stations off the air. The Federal Communications Commission reports eight FMs and one AM station are out of service. The count, gathered from submissions to the Disaster Information Reporting System (DIRS) did not identify the stations or their locations.

The storm left a glace of ice across the mid-Atlantic and South, bringing down power lines which likely left many stations without backup generators without any electricity with which to remain on the air...``
https://www.insideradio.com/free/nine-radio-stations-off-air-after-winter-storm-cuts-across-the-country/article_18105956-1414-4a1f-a60e-c9d68a3bb5aa.html
(Glenn Hauser, OK, WOR)

** U S A. WWCRs still OFF the air, Jan 26 at 2038: no 13845 or 12160; and at 2302, no 13845, 9350, 7520. At 0115 and 0254, no 5935, 5890 or 4840. Prop OK as neighbor WTWW is on 9930, then 5920. Severe ice storm damage at WWCR? (Glenn Hauser, OK, WOR)

** U S A. WWCR still off the air: Jan 27 at 0724, no signals on 4840, 5935; at 1628, nothing on 13845, 12160. Does anyone know exactly what the problem/damage be? Nothing about this found on website. Latest press release is from 2013! (Glenn Hauser, OK, WOR)

** U S A. 13845 & 12160, Jan 28 at 1717 UT, WWCR still off the air, no signals. Ron Trotto refers us to `Ask WWCR` on website for more info about the situation; my notes:

It`s the second broadcast in January, till further notice due to the weather. Four of us are here presently; two stayed overnight. This is #604, with Brady Murray and Zach. Recorded Saturday 24th when there are already several inches of snow, with more snow, sleet, freezing rain expected for 24 hours more. Giant storm across the US. More ice, rain expected. Reggie and Greg are also in. Don`t want to drive anywhere. Below freezing for a week or two, not going to thaw. Concern is ice, bringing down trees, powerlines, extended period without electricity. At least getting this broadcast done and on website. Transmitters are water-cooled, so without electricity the cooling water stops, freezes, damaging transmitters [if on the air]. Plan to keep everything in good shape as long as we can, with generator, heaters outside. May run out of supplies.

If delay returning to air, it`s due to weather or could be due to repairs taking place. Snow is not nearly as bad as ice. Doesn`y take a

lot of ice to damage phone lines, which are a lot like the struxure of our antennas [rhombix]. Already even today at 10 am had a transmitter go down, making horrible noise. Main blower had somehow moved. Engineer Phil has never seen that happen before, two belts torn up. Phil got it repaired in 45 minutes. Not clear if weather caused, not very cold inside that building. You and Reggie did a fair amount of work today, clearing road. Not expecting anyone, but a broadcaster did come in to record. Two big trux were about to collide, then came back. Video footage shows almost nobody driving, just some tractor-trailers, or with plows on front. Focusing on main roads. In 24 hours expecting final burst of snow, then bitter cold. As much as 20+ inches of snow predicted. Putting this out to let folx know, if website still up, long duration storm.

At 11:38 into show, one other topic: Chris got a call saying that 7 MHz frequencies were not performing as usual, but 7490 mornings was heard in China close to Mongolia, QSLed, SINPO 43444, incredible. 7490 starts about sunrise. Really excited to hear from China. Will sleep on couch or whatever we have to do. Ask WWCR is a biweekly presentation (Glenn Hauser, OK, WOR)

** U S A. 7505, Jan 22 at 0725, JBA carrier, presumably WRNO late again but propagation much degraded (Glenn Hauser, OK, WOR)

** U S A. 7505, Jan 25 at 0737, S9+20 undermodulated English, presumably WRNO as sometimes extended (Glenn Hauser, oK, WOR)

** U S A. 660, Jan 22 at 0730 UT, ``660 AM The Answer``, QRM de equal level ABC Deportes, XEFZ Monterrey NL. Is KSKY Balch Springs [The Metroplex] TX, U4 7200/600 watts. Both day & night patterns have major lobes thisaway, but seldom heard (Glenn Hauser, OK, WOR)

** U S A. 780 kHz, Sun Jan 25 at 0740 UT, WBBM ``105.9`` zips right past `StarDate` with otherstuff, seems to be a regular Sunday defect. Timechex following are wrong, like ``45 past the hour`` at 0743 - really an edited? replay of several hours earlier (Glenn Hauser, OK, WOR)

** U S A. 880, Jan 28 at 0758 UT, Mexmx, 0800 break for ID in English as KJOZ Conroe-Houston, Latino Broadcasting, back to Mexmx. No mention of FM. Not religious, at least not now. A few minutes earlier I was hearing KRVN NE instead on 880, but none of it now (Glenn Hauser, OK, WOR)

** U S A. 1040 kHz, Jan 24 at 0726 UT, no bigsig from usual WHO Des Moines; is it off? Others were making the same inquiry. However, I finally detect C2CAM JBA // KTOK, KGWA et al., and WHO is the only C2C on 1040 per NRC AM Log. It may be drastically underpowered; and/or auroral condx with other northerly signals much attenuated like 890 & 780 Chicago; 1110 KFAB Omaha also weaker than usual. But see unID 1460 (Glenn Hauser, OK, WOR) See also OKLAHOMA

** U S A. 1120 kHz, Sun Jan 25 at 0605 UT, deadair from KMOX until 0606 start `Our American Story` - or did I mean 0705 UT? Yet per sked https://www.audacy.com/stations/kmox/shows/show-schedule
OAS is at ``3am`` presumably meaning local CST = 09 UT! Or does Audacy promote eastern-zone primacy no matter what? We in the Central zone are rather tired of having to subtract one hour from TV/radio network program times treating ET as if nothing/nowhere else matter (Glenn Hauser, OK, WOR)

** U S A. 1350 kHz, Jan 22 at 0737 UT, Spanglish ``favoritos en KSDN? 13-50 AM``. It`s surely really this per NRC AM Log: KXTN San Antonio TX, U2 5/5 kW, ``Tejano & Proud`` slogan and format. Night pattern pulled in toward north, major lobe SE, and several minor lobes.

Suspect really on ND day pattern. It was KCOR during my stay in San Antonio in the 1970s. Apparentely first time heard here as KXTN (Glenn Hauser, OK, WOR)

** U S A. 1650 kHz, Jan 24 at 0719 UT, continuous tone of about 320 Hz, i.e. ``carriers`` peaking plus and minus 320 from 1650.000, not a het from elsewhere, and still at 0755 over algo in English. Looks like KSVE El Paso TX is back to its old trix of toning all-night instead of deporting. Last previous log in 2025y: ``1650, April 16 at 0618 UT, continuous tone matching keyboard at D# = 311 Hz, presumed overnight filler by KSVE El Paso`` Several later logs of other 1650s mentioned no tone then (Glenn Hauser, OK, WOR)

UNIDENTIFIED. 209 MCW kHz, Jan 27 at 0727, JBA carrier. DXinfocentre.com and RNA list show only four NDB anywhere, closest being ITR, `Kit Carson` Burlington CO, 25 watts; others in NY, NH and QC. OR: three 40 kW broadcasters in Mongolia; none in Europe (Glenn Hauser, OK, WOR)

UNIDENTIFIED. 1460, Jan 24 at 0724 UT, S9+35 open carrier atop a weak C&W station. Most likely usual dominator, KXNO Des Moines IA which is 5 kW at night and direxional thisaway. Or KHOJ St Charles MO also thisaway but 12000/210 watts (Glenn Hauser, OK, WOR)

UNIDENTIFIED. 9130 LSB, Jan 26 at 2311, 2-way in colloquial Spanish (Glenn Hauser, OK, WOR)
